EXPERIENCE

ZUPPLE LABS

Remote | Bengaluru

SDE Intern

Feb – July 2026

- Architected and implemented backend systems capable of operating at a **scale of millions**, significantly reducing manual workloads for clients and **reduce issuance time from 24h to 3h**.
- Developed and integrated advanced **blockchain technologies** into enterprise applications.
- Actively participated in internal team discussions and client-facing meetings to align **technical solutions** with business requirements.

PASSDN

Remote | Ahmedabad

SDE Intern

June – July 2024

- Developed **RESTful APIs** and backend features using **Node.js**, **Express.js**, and **MongoDB**.
- Designed payload structures and API routes for the **ONDC Mobility** module
- Collaborated with the team via Slack; worked on tasks assigned through Jira**

Presonal PROJECTS

MICRO MERIT PORTER

[Code](#)

- Designed and developed a **full-stack micro-credential aggregation platform** enabling learners, employees, and issuers to issue, manage, and verify micro-credentials.
- Implemented a **TypeScript-based React** frontend with a **Node.js + Express.js** backend, integrated with a **FastAPI-based AI service** for analysis and a **Solidity-based blockchain** layer.
- Built **asynchronous** and reliable blockchain processing using **BullMQ** with **Redis** for job queuing and transaction handling.
- Architected a modular backend with secure data storage and querying using **PostgreSQL**.
- Tech Stack:** TypeScript, Python, Solidity, Node.js, Express.js, FastAPI, React.js, PostgreSQL, Redis, BullMQ

TRAVELOOP

[Code](#) | [Demo video](#)

- Designed a **full-stack collaborative travel planner** enabling users to receive **AI-powered place recommendations** based on customized filters for specific cities.
- Implemented **optimization journey algorithms** with **map integration** using **Leaflet** to efficiently route trips.
- Integrated comprehensive budget analysis and real-time trip collaboration features with best UX.
- Tech Stack:** React.js, Node.js, Express.js, MongoDB, Socket.io, Leaflet, Tailwind CSS

SIDE PROJECTS

TEMPLATE GOBLIN

[Code](#) | [Live](#) | [NPM](#)

- Developed an **open-source PDF template engine** generating PDFs at scale .
- Built a visual **drag-and-drop builder** enabling non-technical users to seamlessly design custom templates and Developers can **integrate CDK in code and get pixel perfect PDF**.
- Tech Stack:** TypeScript, Node.js, PDF-Kit

AURA ORBIT

30+ GitHub Stars

[Code](#) | [F-Droid APK](#)

- Developed an Android App featuring a fully interactive **3D sphere** of apps with many customization.
- Engineered using **libGDX**, utilizing a **golden angle Fibonacci distribution** for precise 3D app placement.
- Tech Stack:** Java, libGDX, Android SDK

SKILLS

Languages: Java, TypeScript, JavaScript, SQL

Frameworks & Libraries: Node.js, Express.js, React.js, Redux

Cloud & DevOps Tools: Git, Docker, GitHub Actions, AWS, Linux

Databases: MongoDB, PostgreSQL, Redis

Technical Concepts: Networking, DBMS, Operating System, REST APIs

AI: Claude Code & Claude AI, AGY

EDUCATION

Birla Vishvakarma Mahavidyalaya

Anand, Gujarat

B.Tech, Computer Science (2022 – 2026)
